

friendlyway empire 22

Sometimes there is a need between a fully featured and a basic terminal. The friendlyway empire 22 meets the requirement of standard self-service options in an unobtrusive design.

The friendlyway empire 22 housing provides enough space for today's standard function requirements in a simple, uncomplicated housing design. All the installed components can be easily reached through the service door.

A 22-inch display with touch screen support provides enough space to attractively present your content and applications.

The friendlyway empire 22 is the solution between a fully equipped system and a basic terminal.
