

friendlyway grande 46[®]

The friendlyway grande 46 is a modern presentation totem with brilliant content presentation with two 46 inch displays on both sides. Due to the second display integrated in the terminal backside the friendlyway grande 46 uses the available ad space optimally.

The bright 46-inch display presents your content in the best HD quality and high luminosity. Thanks to the modern touch-screen technology both terminal side can be operated independent from another. In addition the totem can be enhanced with input-/output options like a printer, cardreaders or proximity sensor.

This modern form of the public content presentation, the friendlyway grande 46 extends your information presentation potential in a new way and makes it widely available.

Benefits

Central public positioning of your content for optimal visibility of your content

Appearance fits to any surrounding and can be customized

Customers can easily receive important information per touch screen query

Access to hardware components is secure and easy for maintenance
