

friendlyway a-sign 26[®]

If you want to provide targeted information to your customers or employees without much effort, the friendlyway a-sign 26 is your best choice.

The compact, slim housing of the friendlyway a-sign 26 can be easily mounted directly on the wall.

With an embedded computer, the system provides interactive applications unlike common playback systems. The touch screen allows direct operation by the customer.

The friendlyway a-sign 26 is ideally suited for communication of your key messages.

Benefits

Optimal communication of your products, services and key messages

Your end customers or employees receive current and interactive support

Different forms of media such as video, audio, and other software applications are possible due to the embedded computer

Online and offline operation is possible

Detailed response statistics provide key information about the effectiveness of your communication

Reduced operation costs due to the possibility of remote control and remote content management
